-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-19 are pending.

2. Applicant's election of species, stress test in the reply filed on 1-20-06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

3. Upon further review the species election has been removed, all species have been examined.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yabunaka et al.

Yabunaka et al., teaches the detection of MIF concentration in the blood of type II diabetes patients and that is elevated as compared to normal patients. It is noted in view of the specification on page 2, type II diabetic patients fit the criteria of a person not predetermined to be subject to cardiovascular disease.

The prior art teachings anticipate the claimed invention.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: there are not control measurements and comparisons in the method steps. Without comparing the observed MIF value in the patient at potential risk of

Art Unit: 1644

cardiovascular disease to a control population and wherein elevated levels of MIF correspond to increased risk of cardiovascular disease in the person not predetermined to be a subject to cardiovascular disease, the claims are incomplete. Anyone of skill in the art practicing the claim would need to compare the experimental MIF to a control in order to determine the result obtained is useful.
